

COLOR, COLOR, COLOR, COLOR, COLOR CHAMELEONS!

Help these chameleons communicate by giving them bright and beautiful colors and patterns.

WILD WONDER!

Chameleons have four layers of skin, each with different colors. Nerve impulses and hormone changes cause the skin cells to shrink and expand. Blending the different layers of skin creates unique colors and patterns.

SUIT UP!

Step into outer space for even a minute, and you're going to need a spacesuit! Spacesuits provide a pressurized atmosphere, breathable oxygen, controlled temperatures, and protection for astronauts from flying debris.

Design your own protective spacesuit in the space below.

THE FIRST MARTIAN
Fill in the word balloon above with what you might say if you were the first person on Mars!

An astronaut is someone who is trained to travel in spacecraft.
